Study of attitude of parents toward female sports

Urmila and Dr. Ishwar Singh

Abstract
A research study was conducted to know about the participation of Haryana girls and women in sports and philosophy of Haryana. The population of this study was different school students’ parents of District Bhiwani. Total 400 respondents selected from within the population through convenient or available sampling technique. For the purpose of collection of data a structured questionnaire on five point Likert scale, ranging from strongly disagrees to strongly agree, was prepared and handed over to 400 respondents with the help of teachers in physical education of concerned schools. The main objective of the study was to know about the participation of girls and women in sports and philosophy of Haryana. The result of the study indicated that parents like sports and their opinion about women sports are good. The result of the study further confirmed that Haryana people philosophy about women sports is now changing day by day.

Keywords: Haryana, sports, women, sports participation

Introduction
As women were supposed to be and in some areas of India are still thought to be cursed by some strata of society their birth was seen as a burden. Women In particular, women in sport leadership can shape personality towards women’s capabilities as leaders, especially in traditional male areas. Women’s participation in sport can create a substantial contribution to social life and tradition development. In all this procedure women do not have any say they induce to do according to the wish of their husbands even if she does not desire to abort her have any alternative. With the help of these social reformers, women of India slowly started seeing her true potential. She set about questioning the rules set down for her by the society. The Indian woman’s focus of this is a new Olympic, constructed along a former industrial site at Stratford in the NEXT OLYMPIC SPORTS. The Games also make employment of many venues which were already in place before the bidding. Researchers that surveyed the content of numerous issues in a variety of sport Magazines came to the general conclusion that women’s sport (Anand, 2007) [2]. Experiences were depicted in stereotypical gender roles and that adult females were often infantilized and/or depicted as sex objects (Best, 1959) [3]. His gentle and religious beliefs led him to state that: “The solemn periodic manifestation of male sport based on internationalism, on loyalty as a means, on the arts as a background and the applause of women as a recompense. (Dutt, 1989) [4]. Women and girls stand to achieve specific individual opportunity for participation in physical activity. Females and immature ladies have led up top leadership space in sport, such as Presidents and Secretaries-General of National associations and team. More women are too taking up employment opportunities in all areas of sport, including as national coach, referee, managers, officials and sport journalists. As sports has developed into a distinct scientific discipline in itself and each nation is varying with each other to produce to class players to win laurels in international competition. Considerable research is developing to identify factors that will be predictive of achieving high level of skill in a given sport with proper coaching.

Conclusion
It is concluded that People of Haryana not only like women sports but they want to encourage the women participation in sports practically for their overall development. Parents encourage the women to participate in sports, to promote good health and fitness and to maintain healthy life style but their ethnicity, culture, spiritual and physical challenges constrain them to participate in sports. Moreover now sports is seen as a respectable activity for women in India and parents, family members, relative and society members discourage the women to participate in sports and physical activities.
