Keywords: yogic exercise, baseball player, sports seekers

Introduction

Yoga is essential for all sportsperson. Yoga can improve the performance of all sport. Yoga releases stress and creates inner peace and also trains the body, mind and spirit to become strong and flexible. The benefits of yoga are observed and written by successful athletes and sportsmen. There are unlimited benefits of yoga. We all know that yoga increases the flexibility of the muscles but one also gains balance and poise from the various yoga poses. The different yoga postures imports strength to the body. The deep breathing exercise which forms the fundamental part of yoga helps to send oxygen to the body cells. Yoga improves and complements the ability of the athlete in any sport that he chooses. Yoga also brings about coordination between body and mind and this enables them to function efficiently. Stiffness of the back is a common problem among cyclists. Yoga back postures could heal this stiffness; also the stretching poses could heal the stiffness of the legs and shoulders. People who play golf are prone to uneven muscular development because when a golfer swings he uses the same muscle group all the time and this cause's muscular tension. Yoga Postures stretch these muscles and eases the muscular tension. For any sportsman yoga could be taken up as a warm up and warm down routine. The benefits which yoga can give to a sportsman cannot be overlooked. Yoga builds energy in a non-aggressive manner. Yoga releases tension through a slow, tension less process. It brings about more focus, flexibility, mobility and strength which are needed by the sportsman to keep themselves fit. There are still many more advantages of yoga for sportsman.

The purpose of the study

The purpose of the present study was to find out the roll of Role of Yogic exercise on Baseball Players.

Methodology

To achieve the objectives of the study 75 Male Baseball Players of Raipur & Bilaspur District, Were selected as a sample of the study and level of participated was State Level, between the ages range of 16-21 constituted the subjects of the study. The data of the subjects was collected by standardized tools the stop Watch, Measuring Tape and using statistically analyzed "t" Test method.
