Assess the condition of volleyball movement increase in Que Son district - Quang Nam province

Dr. Nguyen Xuan Hung

Abstract

The powerful volleyball movement in many cooperatives in the province has an extensive improvement to create cohesion in the community, encouraging people to work strong, develop, exercise, practice, and support to bringing out local social-commercial development tasks. Stemming from that practice, the situation of volleyball movement in Que Son district - Quang Nam province is now necessary.

Keywords: Evaluation, situation, movement, cinnamon paint volleyball, Quang Nam

1. Introduction

Mass sports still stop at organizing mass competitions and competitions at elementary sports activities, folk games, traditional sports associated with popular festivals in each country; Family sports contests, sports contests of traditional minorities, sports tournaments in the Culture, Sports and Tourism regions, Arts - Sports prizes for people with disabilities ...

2. Research Methods

The research process uses the accepted methods: analysis and synthesis of documents; interview; pedagogical observation; pedagogical examination; Mathematical statistics.

3. Results and Discussion

1. Assess the condition of volleyball training development of cooperatives in Que Son district, Quang Nam province
2. The situation of design and public distribution in Que Son district, Quang Nam province

Table 1: Structure and delivery of the public in Que Son district

No	Ingredient Number	Percentage	%
1	Officials	5.870	4.53
2	Farmers	83.205	64.21
3	Armed Forces	3.100	2.39
4	Student	26.725	20.62
5	Other components	10.678	8.25
	Total	129.578	100

Que Son terrain has over 60% of the area is hilly, the West has great mountains. The small plains in the east and interspersed among hilly areas. The high mountainous terrain is concentrated in the West, accounting for over 60% of the all-natural areas. The hilly topography is contiguous between great mountains and plains, the average height of 50-150 m. Distributed mainly in the basic region, the area accounts for about 30% of the full natural area. The delta is concentrated in the east.

3.1 Situation and orientation of sports movement development in Que Son district

On August 9, 2012, the People's Committee of Que Son district issued a project to develop artistic and sports institutions in Que Son district for the period of 2012-2020. In later years, along with focusing on promoting development, Socii-commercial, developmental, and sports

 University, Vietnam

activities are gradually invested and developed. However, the system of developmental and sports institutions from the

district to an elementary level only satisfies a part of the people’s needs of developmental, arts, and sports activities.

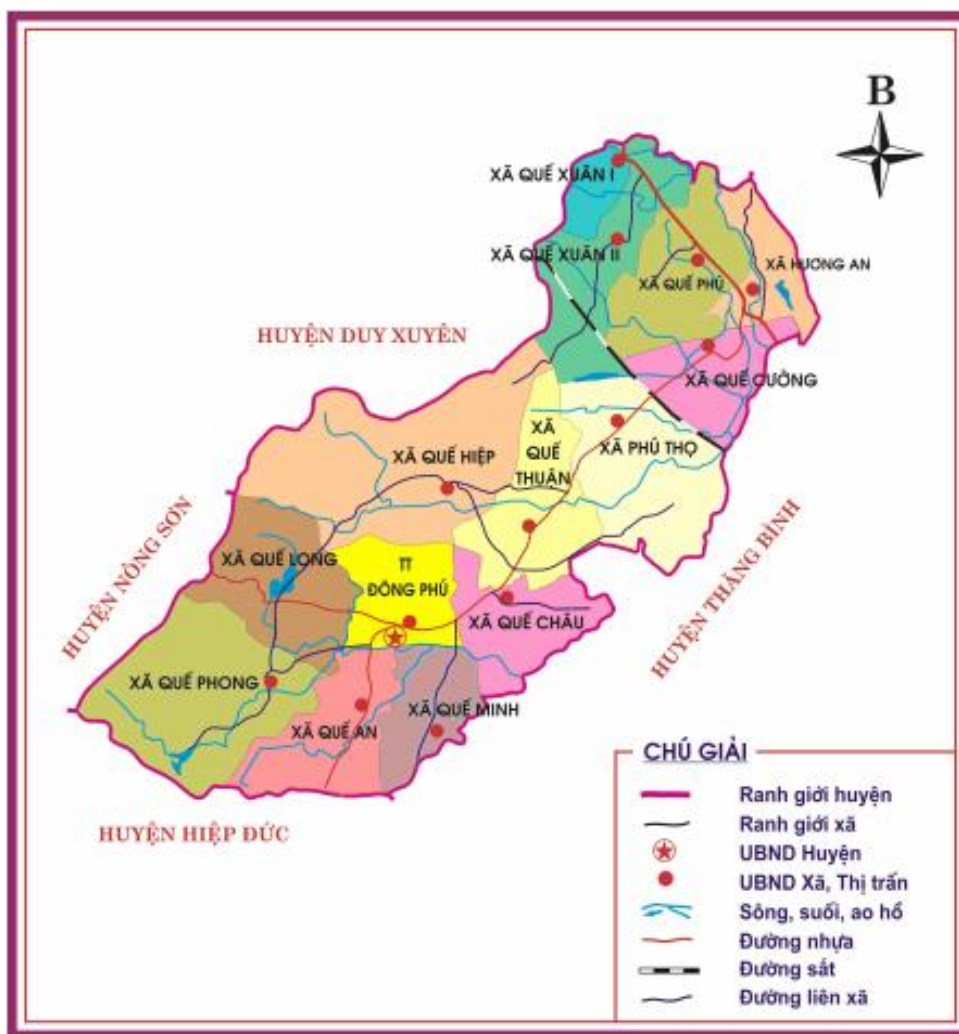

Fig 1: Administrative map of Que Son district, Quang Nam province

The district’s personal training and sport movement in later years have developed quite well. The district has 14 men’s soccer teams, 14 men’s and women’s volleyball teams in 14 communes and towns. Establishing clubs such as Martial Arts Club, Badminton Club, Nursing Fitness Club, Boat Racing Club, ... Schools in the district have well implemented the domestic and extra-curricular physical education programs. Developing cultural and sports institutions in Que Son district in the period of 2012-2020 in close association with the

Planning on cultural career development of Quang Nam province in the period of 2012-2020; Planning on the development of physical training and sports in Quang Nam province in the period of 2012-2020, a vision to 2025 and the Project on building new rural areas in localities.

3.2 Organizational architecture, control apparatus of Que Son Culture, Sports and Tourism Center

Table 2: Current condition of the contingent of sports and physical workers at the Que Son District Sports Center.

No	Composition	Number	Tasks	Qualifications
1	School	1	In charge of general university management	university
2	Deputy Head of Division	1	Preparing and supporting the Head of the University in using sports activities	university
3	Staff	4	Carry out the plans corresponding to specific assignments: - In charge of sports activities throughout the district - Operating facilities, yard, and tools - In charge of sports activities at school block - In charge of managing clubs, associations and point units on Sports activities	Universities and Colleges
4	Collaborators	6	Assist in organizing sports activities and sports competitions of localities	University and college

Through Table 2, we get the organizational structure of the center: 01 head, 01 deputy head, 04 employees, and 06 collaborators. We force the staff members in the management structure and there is a logical assignment of work according

to each specific task. In the staff organization of this management, half of the staff have university qualifications, some are college stage and all have practice in sports and physical education. This is a significant advantage for the

advancement of the district sports organization. Since being detached from the Department of Culture, Information, Communication, and Sports, the activities of the district sports center only focused on playing sports physical functions, which has established the district's physical movement to have many starts. sharp and thrive. However, with the district's population of 129,578 people, the

number of officials who built the sports and physical movement is only 12 so few. That involves the improvement of community sports development.

3.3 The situation of equipment, volleyball training equipment in communes of Que Son district

Table 3: Results of statistics on volleyball training facilities in Que Son district, Quang Nam province no. Communes and towns Number of volleyball courts Quality Pass, fail

No	Communes and towns	Number of volleyball courts	Quality	
			Pass	Fail
1	Dong Phu Town	4	1	3
2	Que Xuan Commune 1	2	0	2
3	Que Xuan Commune 2	1	0	1
4	Que Phu Commune	1	0	1
5	Huong An commune	2	0	2
6	Que Cuong commune	0	0	0
7	Phu Tho commune	1	1	0
8	Que Hiep Commune	0	0	0
9	Que Thuan Commune	3	2	1
10	Que Chau Commune	3	1	2
11	Que Minh Commune	0	0	0
12	Que An Commune	3	1	2
13	Que Long commune	1	0	1
14	Que Phong commune	0	0	0
Total		21	6	15

Through the analysis in Table 3, we noticed that in the types of equipment, yards and training material are losing (21 training yards), the number of efficient courts has 6 yards (28.57%) and the number of yards has not got there are 15 yards (71.43%). In the training ground system, statistics show that we have not reached the courts because of old equipment, diminished over time without being replaced, such as torn nets, rusty grid columns, parachute ropes without borders., the yard is not the right size, the surface is rugged ... It has shown that the volleyball training movement has been concerned by the conditions of the yard is not supported. Besides, the yard also involves the spirit and motivation of the trainee. Therefore, building up the quantity and quality of the training ground is necessary for the Culture and Sports Department of Que Son district and the local agencies. From the results of the people's volleyball training demand, we showed it that the number of people will to practice volleyball was small, and the training movement was very limited because of the facilities. substance, equipment, and training are not maintained and lack of synchronization.

3.4 The development of volleyball training movement of communes in Que Son district.

Practice and play in volleyball as entertainment after study hours, work hard, and train yourself to prevent disease, develop the fitness of each person exercising. The volleyball training movement in Que Son district attracts many people from junior people to middle-aged people. The training time is in the afternoon every day and most concentrated in the time of establishing big vacations, local traditional vacations. The spontaneous workout movement is the major one, the method of practice, competition, and the referee is told by the players. However, because volleyball is a popular sport, it is a sport easy to do and interesting to engage in. To have a basis to establish the volleyball training needs of the people in Que Son district, we conducted observations and data surveys at the Department of Culture, Sports and Information of the district and summarized and gathered the statistics. Practice volleyball of the people as follows:

Table 4: Statistical results of the number of people required in volleyball training in Que Son district, Quang Nam province.

No	Ingredient	Quantity (person)	Number of participants in the workout	
			Number (people)	%
1	Officials	5.870	32	2.95
2	Farmer	83.205	465	42.89
3	Armed Forces	3.100	48	4.43
4	Student	26.725	372	34.32
5	Other components	10.678	167	15.41
Total		129.578	1.084	100

Table 4 shows that the number of people engaged in volleyball training is shared among population groups. In which the number of participants in the training is the most farmers (42.89%), supported by the students (34.32%) and the least participants are the cadres and civil servants (2.95%). This shows that the practice needs of the people depend too much on the conditions of time, working conditions, facilities

and traditional living personalities of the country in the district.

Through Table 4 also offers us that only 1,084 people took part in practicing volleyball compared to the total population of the district is 129,578, this number is too small, so most people are still not aware. The role and meaning of sport training and volleyball training produce. Therefore, setting up

the people's awareness about the benefits and importance of physical training and sport and volleyball training is imperative of the party committees, local authorities, cultural and sports bureaus and officials.

3.5 Factors influencing the development of volleyball training and competition movements in communes of Que Son district

To determine these factors, the thesis conducted observations

and analysis of reference sources and interviewed leaders and officials engaging in the sports and physical training activities at the Department of Culture, Sports and Tourism. Quang Nam calendar, Que Son district culture and sports center, commune culture and sports committee, leaders of agencies, enterprises, mass organizations, tour guides, collaborators, and sports and physical education in units. It gives interview results in Table 5.

Table 5: Factors influencing the Volleyball movement of communes in Que Son district, Quang Nam province (n = 100)

No	Influence factor	Degree of evaluation	Very important %	Important %	Less important %
1	Attention of Party committees, authorities, unit leaders, mass organizations (trade unions, youth unions ...)		73	21	6
2	Number and qualifications of sports staff		56	30	14
3	Number and quality of facilities serving physical practice and sport activities		70	21	09
4	Funding for sports activities		79	19	02
5	Propaganda and advocacy		60	17	23
6	Public awareness about the role of sports and media		61	20	19
7	Contents and forms of physical training and exercise		62	19	19
8	The mix of sports and other activities		43	31	26
9	Mechanisms and policies for gymnastics participants		23	24	53
10	System of establishing annual tournaments		47	32	21
11	Emulation and commendation mechanism		31	47	22
12	Training plans and programs		38	44	18
13	Occupational characteristics		12	21	67

The above results show that over 70% of opinions assess the funding sources, the attention of the leaders, facilities are very important; Over 60% of the content evaluation opinions, the practice of sports, awareness and propaganda of sports are very important; The number and qualification of the contingent of gymnastics and gymnastics officials who have been widely commented that "very important" is up to 56%. Less important than the above factors are occupational characteristics (67%), mechanisms and policies for gymnastics trainers (53%).

In a nutshell: Through the results of research on the status of a number of factors affecting the physical training movement for the people of Que Son district, it has been shown that to develop the physical training movement for the district's public, we cannot offer solutions in a way that is rudimentary and inappropriate to reality. It is necessary to base on practical conditions, and at the same time must follow a number of specific principles and bases to propose the most necessary and most appropriate solution to exploit all strengths and overcome the existing problems.

4. Conclusion

From the analysis follows of the topic, allow the topic to get to the coming results:

Through the research deal with, the theory has identified the original situation and identified the causes affecting the volleyball training movement of communes in Que Son district, Quang Nam province including the situation of structure and population distribution; organizational structure, control apparatus of the Center for Culture, Sports and Tourism of Que Son district; exact situation of resources, training equipment Volleyball development of care for the development of volleyball in communes in Que Son district and factors affecting the change of volleyball training and sports development in the communes in Que Son district.
